HISTORY

Spacio was conceptualized and later on established on June 2005. Starting with only two staff, the company was able to stand up and make a name of its own in the interior design world through local trading and purchasing. Soon after that, the company has grown wider. In fact, in 2006, the company started to make and manufacture their own products namely office tables, chairs, and partitions to be able to compete with other companies that are offering the same. In order to stand out in the competitive world of interior design, the company has to be more productive as clients started to ask for newer designs that would fit their offices and home. So, in 2007, Spacio was able to do partnership with manufacturers in China, Malaysia, Indonesia, and Taiwan. From then on, more and more clients have been satisfied with the Spacio manner of service and have gained respect from other companies that they have serviced. Now, with more people and staff to support the company, Spacio is making its way to the top and the clients still counting..
